

Participating in the Industry Exchange Exhibition 2025

January 5, 2026

New Year's Greetings

Happy New Year, everyone.

This year marks our 9th anniversary. We have completed preparations for mass production of our IDL-K30 laser marking device for ID cards, which is technically world-class. We also plan to release a mass-production model of our UV laser marking device for steel instruments in the spring of 2026, as reliability testing is almost complete. We look forward to your continued support this year.

Industry Exchange Exhibition 2025

We participated in an open seminar hosted by the GS1 Healthcare Japan Council.
Dates: November 25 (Wed) - 28 (Fri), 2025 Venue: Tokyo Big Sight West Exhibition Hall.
